

**TRAINING**

## TRAINING

To support our services and promote good practice and safety culture, we offer a comprehensive range of training courses, seminars and workshops.

Our courses are results-orientated with a strong emphasis on practical application. They are all designed to give the engineering practitioner a detailed theoretical background to the relevant physical phenomenon backed with practical examples and case studies.

### RMRI courses include:

- Quantified Risk Assessment
- Risk Based Decision Making in Industrial Asset and Risk Management
- Introduction to Industrial Safety and Risk Management
- Major Hazards Consequence Analysis

We are also happy to provide specially tailored courses to meet specific client needs.
